PROFILE SUMMARY

Ambitious and results-driven **Computer Science undergraduate** with a deep specialization in **Java (Spring Boot)** and the **MERN stack**. With a portfolio of **17+ successfully delivered projects**, I possess hands-on experience in building **scalable enterprise solutions**, implementing secure **JWT-based authentication**, and designing complex **Layered Architectures**. Recognized as a **finalist in high-stakes industry hackathons**, I combine technical rigor with a passion for **clean code** and **performance optimization**. Currently seeking a Software Engineering Internship to contribute to production-grade systems.

TECHNICAL SKILLS

Languages	Java (Advanced), JavaScript, TypeScript, Python, SQL (MySQL)
Frontend	React.js, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend	Spring Boot, Spring Security, Node.js, Express.js, Hibernate ORM, RESTful APIs
Databases	MySQL, MongoDB, Firebase Realtime Database, MongoDB Atlas
Tools & DevOps	Git/GitHub, Vercel, Maven, Postman, Docker, Linux (Ubuntu), Firebase

PROJECTS

LearnLoop — Learning Management System

[GitHub](#)

- **Tech Stack:** Java, Spring Boot, Spring Security (JWT), MySQL, Hibernate, Bootstrap.
- Architected a full-featured LMS using a **Layered Architecture (Controller-Service-DAO)** to ensure high modularity and enterprise-grade maintainability.
- Implemented robust **Spring Security** configurations with **Role-Based Access Control (RBAC)** to secure academic records.
- Developed an **automated course enrollment workflow** and a real-time dashboard, increasing administrative efficiency.

Car Rental — Enterprise Management System

[GitHub](#)

- **Tech Stack:** MongoDB, Express.js, React.js, Node.js, TypeScript, JWT, Axios.
- Developed a high-performance Application using **TypeScript** for strict type-safety and cleaner production code.
- Integrated custom middleware for **JWT-based session management**, ensuring secure communication between the client and REST API.
- Optimized **NoSQL schemas** in MongoDB to handle complex vehicle scheduling and **real-time availability tracking**.

ServiceCenters — Mobile Queue Management

 GitHub

- **Tech Stack:** React Native, Expo, Firebase Firestore, Firebase Auth, Tailwind CSS.
- Engineered a **cross-platform mobile solution** to reduce physical waiting times through a virtual **Live Queue tracking system**.
- Leveraged **Firebase Realtime Database** for sub-second latency updates, providing users with instant notifications on their queue status.
- Designed an intuitive and highly responsive mobile UI using **Tailwind CSS**, ensuring a seamless experience for both iOS and Android users.

Vitality Health (VCI) — Clinical Data Analytics

 GitHub

- **Tech Stack:** Python, Pandas, NumPy, Seaborn, Matplotlib.
- Constructed an **automated data processing pipeline** to clean and normalize large-scale clinical datasets for predictive analysis.
- Developed **statistical models** to identify correlations between patient demographics and high-risk medical trends.
- Visualized complex health data using **interactive heatmaps**, providing actionable diagnostic insights for medical professionals.

ACHIEVEMENTS

- **Finalist, Industry-Level Circle-Edge (2025)** - Advanced to the Grand Finals held at Shangri-La, Colombo.
- **Finalist, Hackathon Coding Competition (2024)** - Successfully developed a Fintech prototype during a 24-hour sprint.
- **Winner, 2nd Best Project (1st Semester)** - Awarded by IJSE for technical excellence and innovative software design.

EDUCATION

HND in Computer Science	University of Bolton via IJSE	2024 - Present
G.C.E. Advanced Level	Ananda Central College (Physical Science)	2022
G.C.E. Ordinary Level	St. Mary’s College, Galle	2019
